EDUCATION

CINEC Campus

2024 - Present | Malabe, Sri Lanka
BSc (Hons) in Software Engineering
Key coursework: *Data Structures & Algorithms, Software Construction and Evolution, Software Quality Assurance, Database Management Systems, Mobile Computing, Advanced Web Technologies, Software Testing.*

Swarna Jayanthi College

2022 | Kegalle, Sri Lanka
G.C.E. Advanced Level - Physical Science Stream

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Java, Python, C#, PHP, C, Kotlin, Dart

Frontend & Mobile: Next.js, React.js, Flutter, Riverpod, Tailwind CSS, Bootstrap, HTML5, CSS3, React (Native)

Backend & APIs: Node.js, Express.js, RESTful APIs, WebRTC, ASP.NET Core,Socket.IO (WebSockets), Laravel, Google Maps APIs

Databases & Cloud: PostgreSQL, Supabase, MySQL, MSSQL, MongoDB, Firebase (Auth, Firestore, FCM)

Testing & QA: JUnit 5, Postman (API Testing), Apache JMeter, Selenium WebDriver, Requirements Traceability (RTM)

DevOps & Tools: Git, GitHub, Docker, Nginx, Vercel, VS Code, IntelliJ IDEA, Android Studio, Figma

Additional Exposure: Angular, Vue.js, Spring Boot, Oracle

OTHER SKILLS

Leadership & Management: Team Leadership, Agile / Scrum Practices, Project Planning, Cross-Functional Collaboration

Problem Solving: Analytical Thinking, Debugging, Critical Decision Making, Requirements Analysis

Communication & Interpersonal: Technical Documentation, Stakeholder Communication, Public Speaking, Client Engagement

Workplace Competencies: Time Management, Adaptability, Active Listening, Conflict Resolution

PROFILE

Versatile Full-Stack Software Engineer and Startup Co-Founder with a solid foundation bridging core web fundamentals (HTML5, CSS3, modern JavaScript) to advanced enterprise architectures (Next.js, React.js, Flutter, TypeScript, Node.js, .NET Core). Proven track record of turning requirements into production-ready web and mobile platforms integrating real-time WebSockets, AI/OCR services, and scalable cloud databases (PostgreSQL, Supabase, Firebase). Dedicated to building accessible, clean, and type-safe systems backed by automated QA testing and agile delivery.

EXPERIENCE

Co-Founder & Technical Lead

2026 - Present

CodeCraft Solutions

Co-founded a software solutions venture, directing technical strategy, system architecture, and modern UI/UX workflows for bespoke web and mobile applications.

Architected and shipped responsive full-stack solutions for local business clients, translating stakeholder requirements into scalable, maintainable software products.

FEATURED PROJECTS

ShelfLife AI - AI-Powered Inventory & Expiry Loss Prevention Platform

React.js (Vite) · Node.js · Firebase · Tesseract.js · REST API · PWA · JavaScript

- Built an AI-OCR scanning module using Tesseract.js to auto-extract expiration dates, cutting manual stock entry time by 90%.
- Engineered a real-time FEFO inventory engine with tiered alerts (30/7/2 days) and automated dynamic flash sales to eliminate expiry losses.
- Architected an offline-first PWA with background sync, role-based access, and an AI conversational assistant for inventory optimization.

SuraMaga - Zero-Hardware School Transport Safety & Fleet Management Platform

Group Project · In Progress · 2026

React Native ·· React.js · Tailwind CSS · Supabase (PostgreSQL) · Firebase Cloud Messaging · Google Maps API

- Contributing to a 4-member team building a mobile app and React admin portal for the All Island Inter District School Children Transport Association, using drivers' own smartphones instead of costly GPS and CCTV hardware.
- Specifying and designing core features: 3-stage QR "Silent Guard" anti-cheat checks, geofenced 500 m / 200 m parent alerts, 10 km SOS rescue handover and Google Maps smart route optimization.
- Designing an offline-first architecture (<50 KB auto-flushing trip cache, offline Guardian PIN verification) with Supabase Row Level Security that hides driver finances from admin accounts.

Kingswood Connect - Real-Time Student Attendance & Management Platform

React.js (Vite) · Node.js · Express.js · Firebase · Socket.IO · Tailwind CSS · JavaScript

- Engineered a hardware-free management platform enabling real-time smartphone QR scanning for desktop dashboards via Socket.IO WebSockets.
- Built a Node.js/Express backend integrated with Firebase (Firestore & Auth) to enforce multi-role authorization (Admin, Teacher, Student).
- Designed an administrative dashboard using React and Tailwind CSS for live attendance analytics, fee tracking, scheduling, and data recovery.

LEADERSHIP

Active Member

AIESEC in CINEC | 2026 - Present

Contributing as an active member supporting youth leadership initiatives and chapter activities.

Student Member & Competitor

IEEE Student Branch of CINEC Campus
2026 - Present | Member ID: 102747783

Participating in **IEEEXtreme 20.0**, a 24-hour global competitive programming challenge, solving complex algorithmic and data structure problems.

Actively engaging in branch technical workshops, coding bootcamps, and professional networking sessions.

AquaSoothe - Cross-Platform Wellness & Hydration Mobile App

Flutter · Dart · Riverpod · Firebase Auth · Node.js · Just Audio · REST APIs

- Smart Hydration Tracking: Tracks daily water intake, auto-adjusting targets based on real-time weather and medication schedules.
- AI Soundscapes: Generates custom relaxation and sleep tracks from text prompts using AI and on-device synthesis.
- Caregiver Monitoring: Enables remote monitoring of senior hydration and medication adherence with sleep correlation insights

KethPiyasa - Direct Farmer-to-Buyer B2B Agricultural Marketplace

Next.js · TypeScript · Node.js · Express.js · Firebase · Tailwind CSS

- Engineered a full-stack B2B marketplace featuring multi-role portals with real-time crop bidding, price negotiations, and map-based supplier discovery.
- Integrated an escrow-based secure payment workflow with automated invoice generation and QR code delivery verification.
- Architected a trilingual localization system (EN/SI/TA) paired with live economic center baseline price tracking for market transparency.

Neth-Sawan - AI-Powered Assistive Web Platform

React.js (Vite) · JavaScript · Node.js · WebRTC · Google Generative AI SDK · Firebase

- Built a real-time assistive communication portal for hearing-impaired users using WebRTC and Firebase signaling servers for peer-to-peer video streaming.
- Integrated Google Generative AI SDK to convert live camera feeds into instant visual contextual descriptions and scannable ambient alerts.
- Designed an accessible, high-contrast user interface compliant with WCAG accessibility guidelines to ensure seamless usability.

RIGA Academy - Dance Academy Management & Online Enrollment Platform

Next.js · TypeScript · Firebase (Auth & Firestore) · Tailwind CSS · Framer Motion

- Built a full-stack academy portal featuring an online enrollment workflow with package selection, slip uploads, and live status tracking.
- Configured Firebase Auth and Firestore for multi-role security (Admin/Student) and developed an admin dashboard for attendance, scheduling, and payment approvals.
- Crafted a modern, responsive UI/UX using Framer Motion and Tailwind CSS featuring interactive class schedules, media galleries, and dynamic animations.
